

ORGANIC STANDARDS

Reagecon

THE PRODUCTS

Reagecon has an extensive range of Organic Standards. These include very commonly used standards and some less widely used but equally important products such as:

- **Volatile Organic Compounds (VOCs)**
- **Phenol Standards**
- **Polycyclic Aromatic Hydrocarbon Standards (PAHs)**
- **Pesticide Standards**
- **Phthalate Standards**
- **Azo Dye Metabolite Standards**
- **Fatty Acid Methyl Ester & Fatty Acid Ethyl Ester Standards (FAMES & FAEES)**
- **Nitrosamine Standards**
- **Polybrominated Biphenyl Standards (PBBs)**
- **Polybrominated Diphenyl Ethers (PBDEs) & Other Flame Retardant Standards**
- **Polychlorinated Biphenyl Standards (PCBs)**
- **Semi Volatile Organic Compound Standards (SVOCs).**

COMMERCIAL BENEFITS

- Ready to use
- Extensive range
- Can be used with a variety of instruments including GC, GC-MS, HPLC and LC-MS
- Presented in high quality amber ampoules
- Customised formulations available

TECHNICAL BENEFITS

- Produced in accordance with EPA methods
- Consistency of product - Independent, Traceable, Certified
- COA's and SDS available online

THE APPLICATIONS

- Calibration
 - External
 - Internal
 - Surrogate
- Quality Control
 - Ready to use
 - Neat
 - Single Compound
 - Multi Compound
- Method Validation
- Instrument Qualification
 - IQ, OQ, PQ, MQ

NEW STANDARDS - COMING SOON

- Cannabinoids
- Opioids
- Antibiotics
- Vitamins
