

5 BENEFITS OF USING REAGECON CONDUCTIVITY STANDARDS

Extensive Range of Values

A wide variety of conductivity standards, ranging from as low as $1.3\mu\text{S}/\text{cm}$ to as high as $500,000\mu\text{S}/\text{cm}$.

Non-Hazardous

All of Reagecon's conductivity standards are aqueous and therefore are non-hazardous, which provides ease and cost of both shipping and disposal and reduced Health & Safety requirements for storage and use.

Guaranteed Stability

Reagecon can guarantee the stability of the complete range of conductivity standards over their entire shelf life, regardless of when the bottle was first opened.

All Values are Certified and Traceable

Certificates of Analysis are available for all of Reagecon's conductivity standards which includes information on date of measurement, test method used and result achieved.

Unparalleled Technical Support

Our Technical Services team is always on hand to answer any questions and we have also created detailed technical papers on various aspects of conductivity measurement, such as, The Selection and Use of Instruments for Accurate Conductivity Measurement.
