

Clinical and Life Sciences Catalogue

Detailed and
Comprehensive
range of
Consumables,
Equipment,
Chemicals and
Reagents for the
Clinical Laboratory
and
Mortuary
Marketplace.

Reagecon

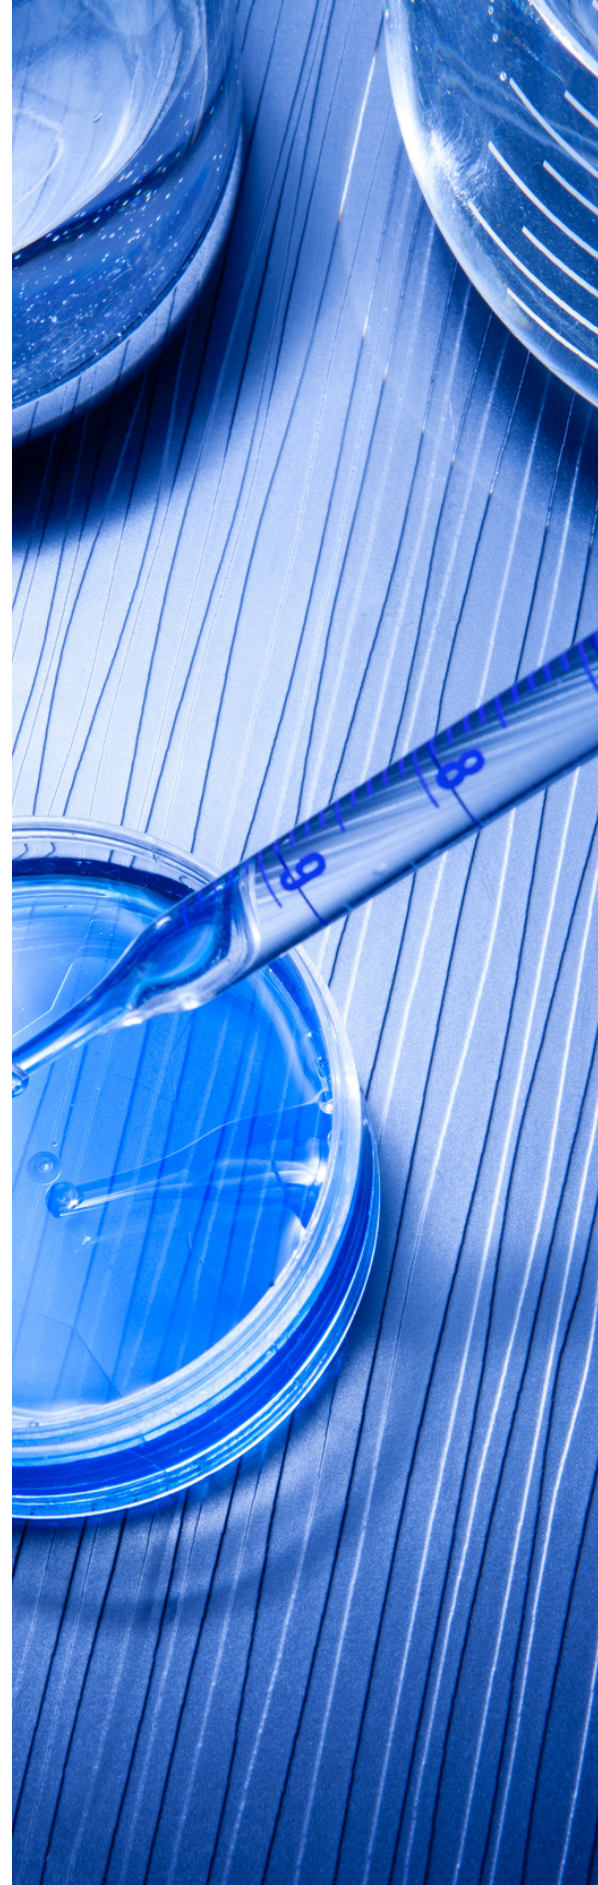

Introduction

Reagecon is an Irish owned manufacturer of Chemical and Physical Standards and Reagents, with sales in 170 countries. Our products are sold worldwide through a network of distributors and private label customers. However, in Ireland our products are sold directly to end users and in addition to our own manufactured products, we are privileged to represent several world-renowned manufacturers. Our relationship with these companies goes back many years and these partners are constantly adding to their product offering. So, it is with great pleasure, that we present in this catalogue, an overview of our growing offering into the clinical laboratory and mortuary markets.

However, in addition to an ever-increasing product offering, we have greatly expanded our ecommerce capability and our customer relationship management capability. These combined capabilities make it easier for you to find the products you require, purchase online, access Certificates of Analysis and Safety Data Sheets, and track and receive the products in an efficient, safe and compliant manner. We use platforms such as SAP, SANA, Salesforce, Pardot and others to deliver, what we hope is the best shopping experience possible. However, we take nothing for granted, we welcome any feedback you can give and we really appreciate your business over the past 30 years.

We look forward to being your partner of choice over the coming years.

John J Barron
Managing Director

Cellpath - Cellular Pathology

The cellular pathology and mortuary markets continue to be a cornerstone of our offering. In the case of cellular pathology, our long-standing partner of choice has been Cellpath. Cellular pathology is a crucial and complex discipline in the diagnosis and treatment of disease and in ascertaining the cause of death following post mortem examination. The complexity of this scientific discipline and the array of product solutions available is outlined in the graphic below. Reagecon, through Cellpath, acts as a one stop shop by offering a range of products appropriate to every stage of that process.

The Milestones in the Cellular Pathology Process

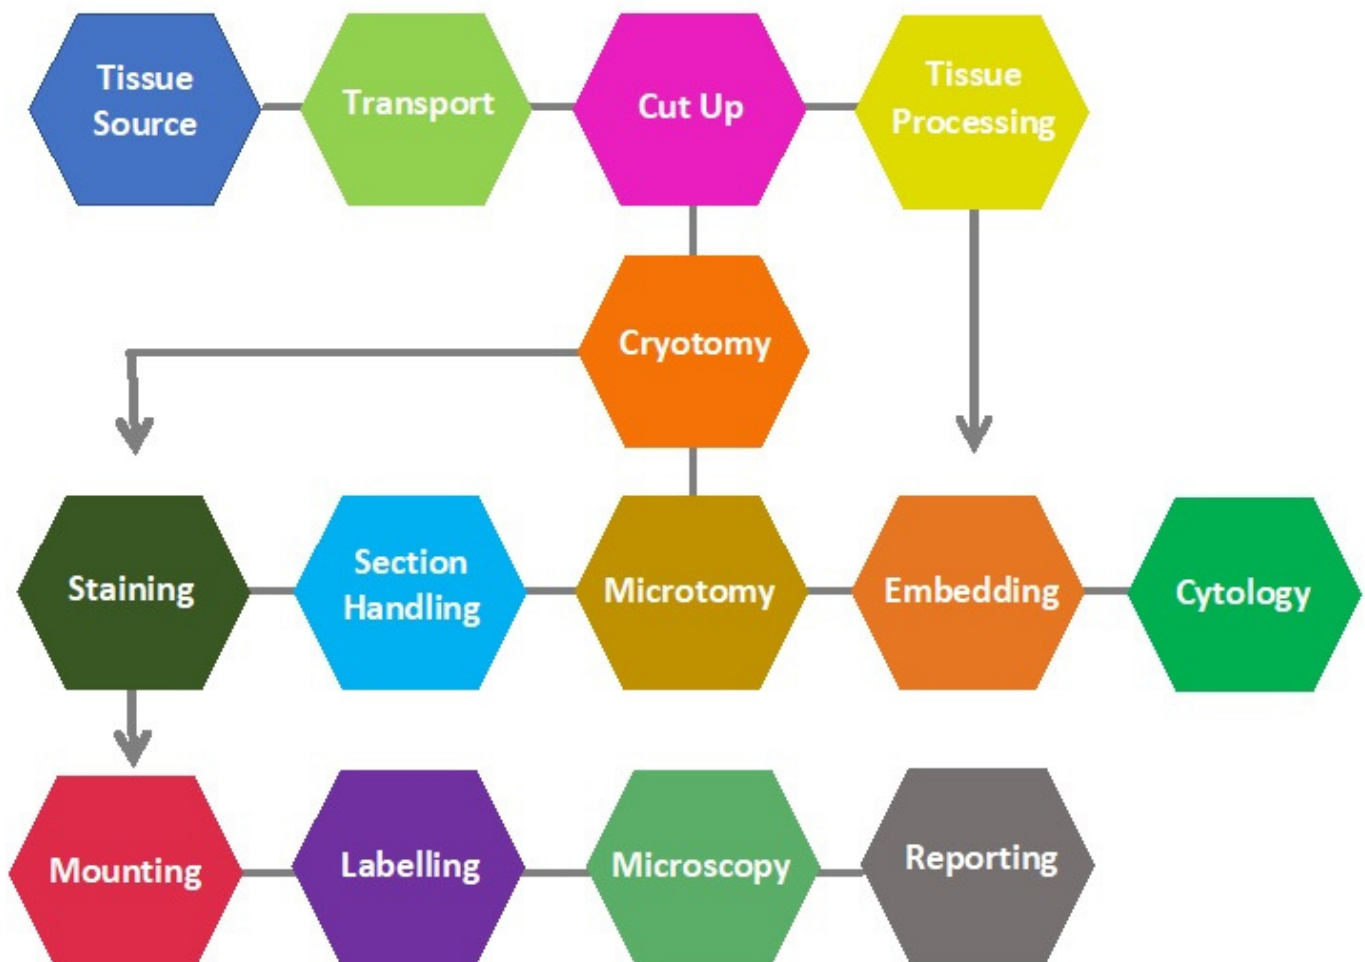

Table 1 and Table 2 show the broad families of products, available from Cellpath, through Reagecon, appropriate to every milestone in the Cellular Pathology process. Graphics 1 and 2 demonstrate how the products can be accessed through Reagecon's online ecommerce facility

Consumables for Cellular Pathology from Reagecon

Consumables
Autopsy and Dissection
Cassettes
Cytology
Embedding Accessories
Microtome Blades and Accessories
Reagents and Fixatives
Safety, Quality Control and Hygiene
Slides and Coverslipping
Stains

Equipment and Apparatus available from Reagecon for Cellular Pathology

Equipment
Heated Forceps and Tampers
Water Baths
Slide Drying Hotplates
Section Dryers and Ovens
Thermometers and Probes

Table 2

Barber Medical – Post Mortem Room

Barber Medical has an outstanding range of products and an outstanding history of delivering these products. The range includes a wide range of appropriate, fit for purpose, high quality instruments and consumables, for the mortuary, as presented in Table 3 below. All are available from Reagecon.

Barber Medical Instruments and Consumables
Body Bags and Shrouds
Needles
Blades and Handles
Cleaning
Consumables - Mortuary/Funeral
Containers
Electric Saws - De Soutter & Medezine
First Aid
Instruments - Knives
Instruments - Forceps
Instruments - Scissors
Instruments - Rib Shears, Saws & Other
Laboratory, Measures & Scales
Mortuary Furniture - Refrigeration & Racking
Mortuary Furniture - Sinks & Cabinets
Mortuary Furniture - Stretchers, Tables & Trolleys
Protective Equipment - Aprons, Footwear, Gloves & Masks
Surgical Lamps

Table 3

Reagecon - Life Sciences Industry

Life Sciences continues to be a growth orientated and exciting marketplace. Reagecon offers a wide range of consumables and instruments appropriate to the Life Sciences industry. The broad families of products can be seen below.

Genomics:

- PCR
- DNA and RNA isolation
- PCR cabinets
- DNA – electrophoresis
- Gel – documentation
- Concentration
- Electroporation

Proteomics

- ELISA
- Microplate readers and washers
- Protein – electrophoresis
- Blotting
- Blot imaging
- Purification

Microbiology

- Culture Media
- Petri dishes and accessories
- Inoculation equipment
- Containers/stoppers
- Sterilisers/Bunsen burners
- Filtration apparatus
- Colony counters

Cell Culture

- Cultivation
- Aspirators
- Filtration
- Safety Cabinets
- General Life Science Consumables
- Microtubes
- Centrifugation tubes
- Deep well plates

Chemical and Physical Standards and Reagents

Reagecon offers a broader and more comprehensive offering of Physical and Chemical Standards and Reagents, than any other company. The products are all made in Ireland and distributed to customers in 180 countries, through our Shannon, Ireland or Shanghai, China distribution centres. Although the products are targeted at a wide range of industries (some are industry specific), many of them are relevant to the clinical laboratory analyst. A listing of the major families of products that may be relevant to a clinical laboratory is presented in Table 4. Just click on the link on any of these families, to see specific products, that may be of interest to you.

Reagecon Branded Physical and Chemical Standards and Reagents
Conductivity
pH Buffer
Turbidity
ICP-MS/ICP-OES
Atomic Absorption
Ion Chromatography
Flame Photometry
Spectrophotometry
Density
Refractive Index
Viscosity
Osmolality
Santising Solutions

Table 4

General Laboratory Consumables and Equipment

Reagecon offers a vast range of consumables, equipment, apparatus and chemicals. Almost all of the worlds leading brands are on offer, the ranges are extensive and all represent excellent value. Product ranges include:

- General Laboratory Consumables
- Occupational Health and Safety
- Analytical Measurement and Testing
- Stirring, Shaking, Mixing
- Sample Preparation
- Distillation, Separation, Filtration

- Heating and Cooling Technology
- Liquid Handling
- Vacuum Technology, Drying, Dry Storage
- Optical Instruments and Microscopes
- Clean Room, Cleaning and Sterilisation
- Chromatography

Laboratory Chemicals

Reagecon offers an extensive range of analytical grade laboratory chemicals, ultrapure fine chemicals and biochemicals. We offer Merck products including the Sigma range of chemicals and a very broad range of Honeywell chemicals. We offer a very broad range of Honeywell products.
